***Allowable Subject Matter***

1. Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record fails to describe and/or sufficiently suggest a system or method for detecting an object in a zone situated in the proximity of an interface between two liquid and/or gaseous media, the said object being illuminated by electromagnetic radiation comprising at least two different wavelengths; the said media having different absorption coefficients as a function of the wavelengths of the electromagnetic radiation; comprising: Choosing from among the wavelengths of the electromagnetic radiation at least two wavelengths or two wavelength regions, creating for each wavelength or wavelength regions, an image of said interface and of the said zone; producing and digitizing electrical signals representative of each image; extracting from the data representative of each image, two groups of data, wherein the groups are representative of at least a part of the object in the near infrared region and the blue-green region respectively; and comparing the groups of data; the producing, digitizing, extracting and the comparing being referred to as deducing the presence of an object; whereby detecting the presence of an object and/or determining the position of the detected object relative to said interface, while discriminating between an object situated entirely under the surface and an object situated at least partially above the interface.

These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
